

Mock Interview Program

1. Mock Interviews on Core Devops Skills (which cover almost 70% of Devops Jobs)
2. Daily Mock Interview Whatsapp Audio Based (builds momentum)
3. Weekly LIVE
4. Job Search Mastery Checklist will ask you to complete 2 modules each week.
5. Switch to Devops Checklist

Note: Take daily consistent actions.

Plan for next 3 months

Week 1: Linux

Week 2: Shell scripting and Python + 2 modules of Job Search Mastery Checklist

Week 3: Version Control – Git & GitHub/GitLab. + 2 modules of Job Search Mastery Checklist

Week 4: Containerization – Docker + 2 modules of Job Search Mastery Checklist

Week 5: Orchestration – Kubernetes (EKS, Helm)

Week 6: Infrastructure as Code (IaC) – Terraform

Week 7: CI/CD – Jenkins, GitHub Actions

Week 8: AWS Services for DevOps – EC2, ECR, ECS/Fargate, S3, IAM, Lambda, VPC, Route 53, ALB/NLB, CloudWatch. Networking Basics – VPC, Subnets, NAT, DNS, SSL/TLS

Week 9: Observability – Prometheus, Grafana, ELK/EFK, Security & Cost Optimization – IAM, AWS Config,

Week 10: Ansible

Week 11: Revision and Mock Interview Practice. Apply for Job Interviews

Week 12: Share challenges, learn from others, types of questions asked by interviewers.

Core Skills:

- **Linux & Shell Scripting** –.
- **Version Control** – Git & GitHub/GitLab.
- **CI/CD** – Jenkins, GitHub Actions, GitLab CI, AWS CodePipeline.
- **Containerization** – Docker (images, networks, volumes).
- **Orchestration** – Kubernetes (EKS, Helm).
- **Infrastructure as Code (IaC)** – Terraform (high demand), AWS CloudFormation.

- **AWS Services for DevOps** – EC2, ECR, ECS/Fargate, S3, IAM, Lambda, VPC, Route 53, ALB/NLB, CloudWatch.
- **Observability** – Prometheus, Grafana, ELK/EFK.
- **Configuration Management** – Ansible
- **Security & Cost Optimization** – IAM, AWS Config, CIS Benchmarks.
- **Scripting/Programming** – Python for automation.
- **Networking Basics** – VPC, Subnets, NAT, DNS, SSL/TLS.
